

OMAR KHALED FAROUK

MACHINE LEARNING ENGINEER & DATA ANALYST

CONTACT

- +20 1024235644
- omar.el3o.74@gmail.com
- Cairo, Egypt
- <https://portfolio.omar-khaled.workers.dev/>
- www.linkedin.com/in/omar-khaled-546099269
- <https://github.com/omarel3o>

TECHNICAL SKILLS

Programming:

- Python
- SQL

Machine Learning & DL:

- Scikit-Learn
- XGBoost
- TensorFlow
- Deep Learning
- Computer Vision
- Time-Series Forecasting (LSTM, GRU)

MLOps & Cloud:

- AWS Cloud
- CI/CD
- MLOps , Flask API , Git & GitHub

Data Analysis & Math:

- EDA
- Data Cleaning
- Data Preprocessing
- Feature Engineering
- Statistical Analysis
- Mathematical Modeling

Visualization & GUI:

- Power BI
- Data Visualization
- Interactive Dashboard
- KPI Reporting , Streamlit

Automation & Libraries:

- Pandas , NumPy, Matplotlib
- Streamlit , n8n , Tkinter
- Workflow Automation Tools
- AI-Assisted Coding (Vibe Coding)

PROFESSIONAL SUMMARY

Passionate Machine Learning Engineer & Data Analyst skilled in architecting end-to-end data pipelines—from exploratory analysis and mathematical/statistical modeling to deployment. Proven track record in solving complex data problems, integrating REST APIs, and automating workflows. Adept at leveraging AI-assisted workflows (Vibe Coding) to accelerate routine tasks, allowing maximum focus on core algorithmic logic and strategic problem-solving.

WORK EXPERIENCE

Temperature Forecasting Using GRU

- Engineered an end-to-end Deep Learning time-series pipeline using TensorFlow/Keras and GRU architecture to process over 8,000 daily weather records.
- Predicted maximum temperature, minimum temperature, wind speed, and wind direction.
- Built an interactive analytics dashboard (Streamlit / Python) to visualize region-based thermal predictions for real-time monitoring.

Flexible Financial Data Retrieval API

- Architected a high-throughput financial data extraction framework, integrating custom REST APIs and Flask microservices to solve latency in real-time market data ingestion.
- Optimized WebSocket streaming communication with Python libraries to process high-frequency candlestick data seamlessly.
- Implemented dynamic time-range selection and multiple timeframe support

Real Estate Sales Analytics Dashboard

- Structured automated ETL data pipelines to clean, transform, and merge multi-source real estate transactional datasets.
- Performed exploratory data analysis using Python and Jupyter Notebook.
- I built interactive dashboards using Power BI and Python and displayed KPIs. Created visual reports to improve stakeholder understanding of sales performance
- Integrated Computer Vision (OpenCV/PIL) modules to automatically process and standardize image assets/listings alongside numerical metrics.

EDUCATION

June 2026

Bachelor of Business Information Systems (BIS)

Al-Alsun Higher Institute , Egypt
